SUMMARY

I am a seasoned software engineering executive with significant experience in mentoring engineers, project leadership, software design and implementation in high-growth organizations. I grew Voalte Engineering from early stage to PE funded and finally to strategic acquisition. I have led teams of engineers closely with significant development and technical input and have also led larger organizations and designed and delivered long-range goals in collaboration with the c-suite and board. I have managed large internationally distributed engineering teams and have a history of delivering high-quality, successful software serving millions of users across the globe.

EXPERIENCE

SVP Engineering, R1 RCM, 2026-Present
Lead Prior Authorization software engineering and Product inside R37, R1's AI and Engineering organization.

CTO, Humata Health, 2024-2026.
Recruited to lead Engineering and Product, focused on building on new product categories. Lead scaling of the provider engineering organization, reorg of the product team, and built our AI and payer engineering teams. Delivered a flexible MLOps platform that privileges flexibility and speed-to-value. Focused on delivery velocity and customer and business impact.

CTO, Artisight, 2023-2024.
Joined Artisight to help standardize and scale engineering delivery. Over five months focused on delivery quality and org and process standardization. Left on good terms to pursue another opportunity.

CTO, Musculo Inc, 2022-2023.
Joined an early stage startup focused on chronic disease management for patients with Rheumatoid Arthritis. Delivered a hybrid build/buy telemedicine/health coaching platform. Built a SOC2 ready cloud-first IT framework that achieved 3rd party risk assessment compliance with two major insurers.

Built a flexible iOS/Apple Watch platform for collecting remote patient monitoring data and symptoms, generating a customized wellness score – piloted with a major insurance company.

Created an ChatGPT-like coaching companion built on foundational 70 billion parameter LLM. Built an AI pipeline to transcribe coaching sessions using OpenAI's Whisper, using those transcripts to fine tune the model. Integrated a vector database to give the LLM better command of clinically relevant data.

VP of Product Management, Care Communications, Hillrom Inc, 2020-2022.
Promoted into a position leading Product Management across all of the Care Communications businesses — Nurse Call, Mobile Communications, and Digital Health / Analytics — representing a $300 million portfolio.

Responsible for mentorship, leading product strategy, and customer relationships including some of the largest in Healthcare (MGB, Cedars-Sinai, UCSF, Ascension). Responsible for building and deepening industry partnerships across Health IT – Apple, Epic, Cerner, Amazon) Led a fundamental reimagining of our entire product portfolio, hastening Hillrom's transition from legacy medical device manufacturer to digital leader in the space. This digital transformation was a core component of Hillrom's $12b acquisition by Baxter in December 2021.

EDUCATION

Cornell University
Ithaca, NY
1997 - 2001, B.A. in Economics with a concentration in Computer Science.

KEY SKILLS

- TECHNICAL LEADERSHIP
- AGILE SOFTWARE DEVELOPMENT
- ORGANIZATIONAL SCALING
- STRATEGIC PARTNERSHIPS
- FUND RAISING
- CUSTOMER RELATIONSHIPS
- PRODUCT ROADMAP DEVELOPMENT
- M&A DUE DILIGENCE
- CLOUD OPERATIONS
- AI / MACHINE LEARNING

AWARDS

- EAGLE SCOUT

Responsible for M&A -- including leading the integration of Excel Medical into Hillrom.

Executive Director, Mobile R&D, Hillrom Inc, 2019-2020.
Post-acquisition took on leadership of additional teams focused on Alarm & Alert management and cross-business internal teams. Responsible for R&D across Clinical Communication, Alarm & Alert Management, DevOps, and UX. Lead a combined team of approximately 90 employees and contractors and was responsible for a departmental budget of $11mm/year.

VP of Engineering, Voalte Inc, 2012-2019.
Responsible for growing a great engineering team into a world-class distributed engineering organization for a fast-growing, market-leading mobile healthcare communications company. Led the software development of products that resulted in a $195 million dollar sale of the company to Hillrom. Grew Engineering from 5 to 55 employees across Development, QA, and UX. Balanced sustaining engineering, launches of new productions on an existing platform, and a ground-up software redesign.

Led a transition to semi-annual major software release cadence on the new platform, shipping major software releases as well as new products on time across multiple feature sprint teams. Brought in best practices around build and deployment, metrics and reporting, and code reviews and testing.

Built and launched a massive Amazon Redshift-based data analytics product storing and analyzing ~ 5 billion records. Integrated development of experimental, forward-facing technologies alongside core products. Effectively balanced technical investment with product delivery.

Managed a departmental budget of $7mm/year. Seamlessly integrated colocated, distributed, and offshore engineering teams with nearly no turnover and high employee engagement. Responsible for long-range strategic planning, budgeting, and employee coaching and mentorship, as well as serving as a technology sales executive.

Foundations, Operations, QA Software Engineering Manager, Canonical, 2010-2012.
Added the responsibility of managing a team of engineers tasked with building the core services that powered Canonical's growing Cloud offering, Ubuntu One. Led the team to build an RPC / supervised solution to deadline, providing dramatic speed improvements to many Ubuntu One services for millions of users. Replaced a custom asynchronous task system with a scalable system built on top of class-leading open source tools and architected a Cassandra-based replacement for a CouchDB based storage platform/API. Responsible for planning and executing a migration from our custom cloud deployment system to one built with Puppet.

Operations/QA Software Engineering Manager, Canonical 2010.
Managed a team of engineers that handled Quality Assurance, deployment, scaling, and reporting on the services that made up Ubuntu One. Led an organization-wide effort to integrate metrics and reporting into all existing services, improving visibility into performance and leading to increased quality. Increased build quality and decreased time-to-deployment via continuous integration and automated testing.

Operations Software Engineer, Canonical 2009-2010.
Built tools that helped deploy, scale, and report on servers that powered Ubuntu One – an early online file sharing service. Automated deployment to early cloud infrastructure on Amazon EC2. Focused on service uptime.

Director of Technology, Customerforce.com 2007-2009.
Wore many hats in a young advertising startup. Work focused on platform scalability. Architected Facebook platform applications, a modern API toolset allowing our software to be integrated into existing systems and built out an advertising display architecture delivering millions of impressions per day.

Director of Web Operations, Dimensional Fund Advisors 2005-2006.
Led a team of programmers and web developers in building and maintaining Dimensional's suite of web products. Led development of reporting tools, new site features, and internal sales and support software as part of an initiative that grew Dimensional's AUM from $35B to $120B.
